Projektblatt Langer Gang

The listed structure "Langer Gang" (Long Corridor) is part of the so-called Nadelburg, one of the last remaining working-class housing estates from the middle of the 18th century. Residences and communal facilities are to be introduced to the historic building after a long period of vacancy. Our job: a historically-appropriate survey. The created as-built plans served as the basis for historical building research as well as for the upcoming refurbishment and conversion plans.
